Global Coding Academy Ltd

Global Coding Academy Ltd is a technology and digital skills company focused on providing high-quality programming education, software development services, ICT training, technology consulting, and digital solutions.

The company aims to equip students, professionals, businesses, schools, and organizations with practical and market-oriented technology skills. Its training programs will cover areas such as programming, web development, mobile application development, databases, artificial intelligence, data science, cybersecurity, networking, cloud technologies, and other emerging technologies.

In addition to training, Global Coding Academy Ltd will develop software solutions, websites, web applications, mobile applications, educational technology platforms, and customized information systems for individuals, businesses, educational institutions, and organizations.

The company will also engage in the supply and sale of computers, networking equipment, digital devices, and other ICT-related products, together with technical support and technology consulting services.

Global Coding Academy Ltd seeks to promote innovation, entrepreneurship, digital transformation, and employment-oriented technology skills. Through physical and online learning programs, software products, partnerships, and technology services, the company intends to serve clients in Rwanda and progressively expand its services to the international market.

Vision:
To become a globally recognized technology and coding education company that empowers people and organizations through programming, innovation, and digital technology.

Mission:
To provide accessible, practical, and high-quality coding education, software solutions, and digital technology services that equip individuals and organizations with the skills and technologies needed for the digital economy.

Tagline:
Learn to code. Build a Shining Future.
